Digital Talent Tools

Challenges are connected

Digital transformation is different because of the combination of these 8 challenges

Organization redesign is required

The key barrier to digital transformation is today's organization

Digital Talent Tools

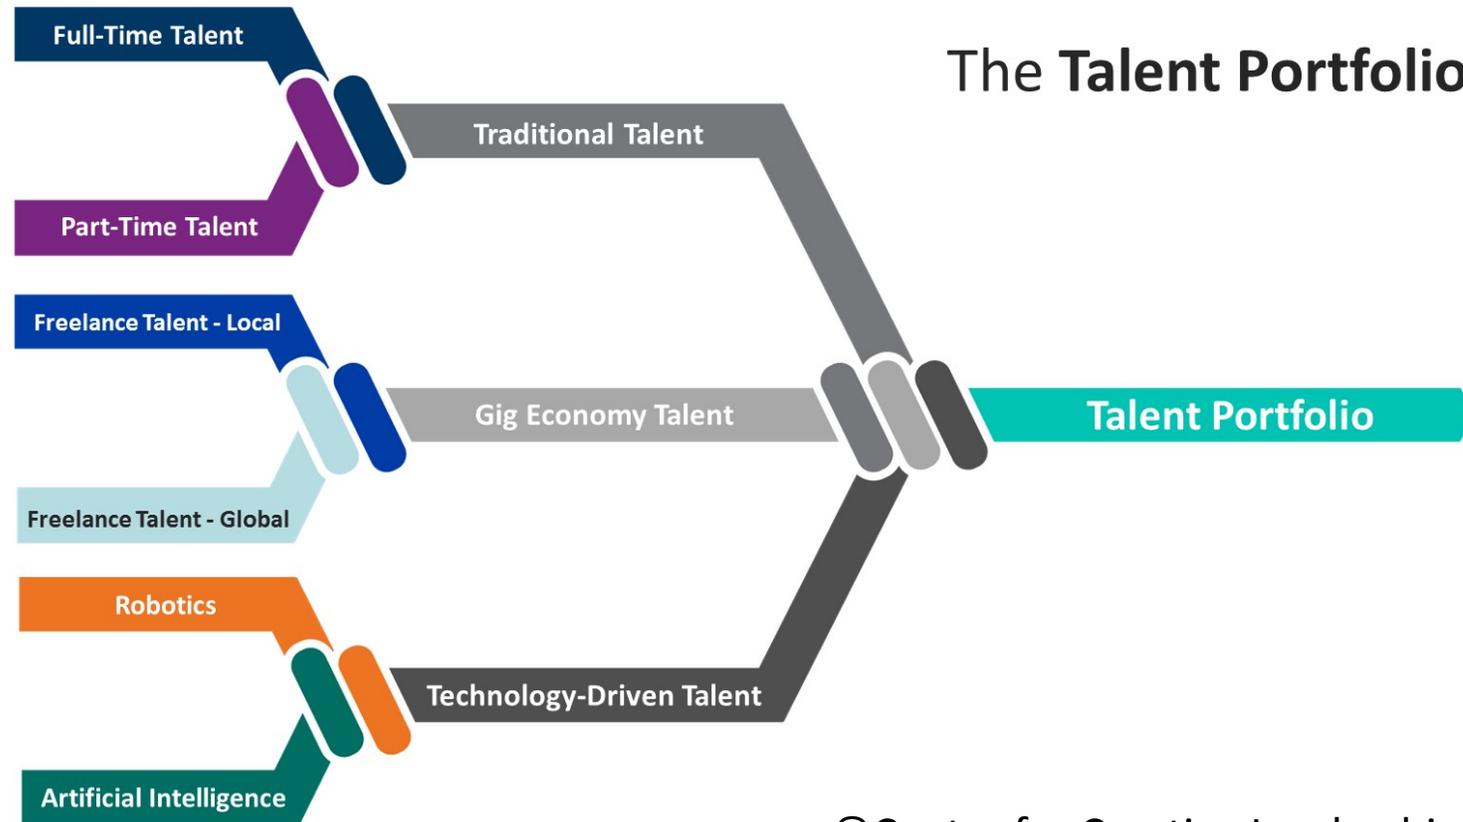

- ❖ This challenge has to do with developing a strategy to upgrade the digital capabilities of talent
- ❖ companies were challenged by the need to recruit and retrain digital talent on the one hand and diffuse digital knowledge on the other.
- ❖ These tools are intended to help raise awareness of the challenge and to provide useful guides to actions you can take to shift your talent to be more digital

Talent	Shift to digital	How should companies attract, retain, or access the digital talent they need?
Helpful reading		Hallenbeck, G., Horney, N., Bateman, S. 2018. Redefining Talent for the New World of Work, Center for Creative Leadership Whitepaper, www.ccl.org
Tools	Description	Use
Key Insights	Takeaways from the Lab	Learn what companies thought was important to know about this challenge
New Talent Portfolio	Model	This tool shows the new mix of internal, gig economy and technology components that will make up future talent portfolios
Talent Cycle	Model	This tool illustrates how talent shifts along with the stages of digital transformation
Digital Sophistication	Model	Use this model to help leaders understand the path from the current to future state of digital talent sophistication
Things You Can Do	List of actions	Some suggestions from the Lab about what your company can do to become more ambidextrous

Key Insights about Digital Talent

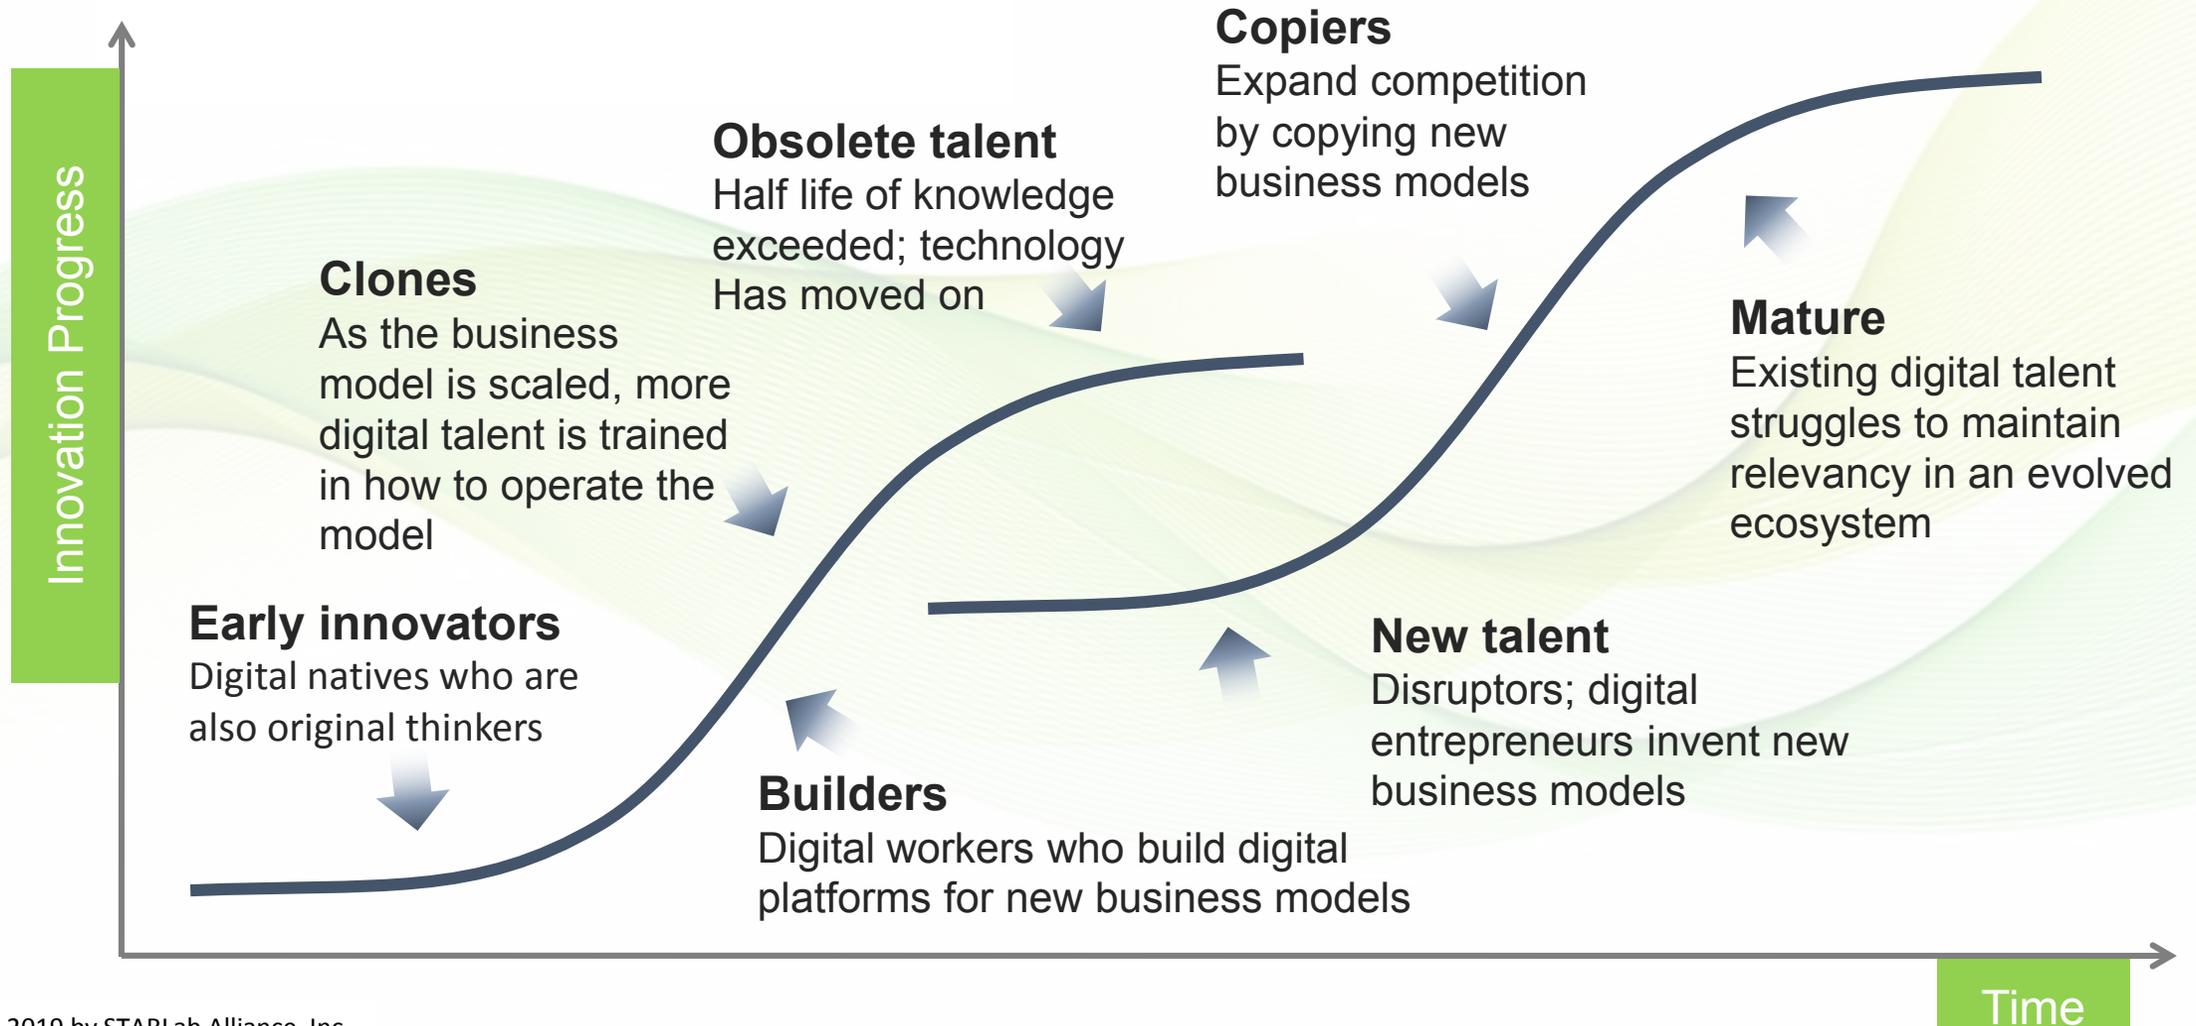

- ❖ Since the demand for digital talent (e.g. software engineering and data scientists with matching communication and soft skills) is very strong, incentives of various kinds are being offered to attract and retain scarce talent. These actions are causing a rift between digital and non-digital employees who ultimately need to collaborate to bring digital solutions to market. Companies sometimes address this by keeping digital and traditional units separate. While this can promote faster ideation, it actually slows down execution of digital strategies as walls go up between digital and traditional units.
- ❖ Organizations are trying to flex their talent portfolios by using more “on demand” external talent on projects, substituting robots or algorithms for humans, or upskilling existing employees to make them more agile in implementing digital innovations.
- ❖ Another trend is to support a greater percentage of employees working remotely using virtual collaboration platforms such as Slack, Microsoft Teams or the Google Office Suite. While this trend will continue, there is a recognition that some of what makes working in an organization attractive and motivating is being lost.
- ❖ A challenge that is still largely “around the corner” is the rapid obsolescence of digital knowledge, even among the most technologically advanced new hires. As technologies continue to advance, organizations will find themselves with expensive talent that is no longer as cutting edge as it once was. Organizations will begin selecting for growth mindset, as well as investing in capability building solutions.
- ❖ Organizations need to develop talent strategies that support their business strategies. This requires having a digital strategy or at least a sense of how and where the organization plans to take advantage of digital opportunities.

Talent Evolves with Digital Transformation Over Time

Levels of Digital Sophistication

Things You Can Do

- ❖ Be more precise about the kind of talent you will need and when you will need it given your digital strategy and business plans.
- ❖ Search for places where you can create a more agile talent portfolio by employing on- demand workers, robots and artificial intelligence.
- ❖ Select for growth mindset and invest in learning so that the half-life of knowledge isn't reached.

The **STARLab Alliance, Inc.** is a non-profit learning consortium focused on creating next generation organization design and leadership models

The **Digital Organization Design STARLab** is a year-long learning experience that allows participants and subject matter experts to collectively explore and prototype practical and innovative responses to digitalization. STARLab Participants include 3-6 senior leaders from 10 companies, well-into the digital transition of their business models, who will partner with leadership and organization experts. The STARLab accelerates learning and creates organization design solutions that optimize the application of advanced technologies and human capital approaches to achieve agility and sustainable effectiveness.
